B. Tech - (IT)

PROJECT

HTuse ⬀

Developed HTuse, an Android app built using Java ,Xml and Android Studio allowing users to publish, download, and share original voices and audio. Functionality was similar to YouTube, but focused on audio content. Successfully published the app on the Google Play Store

STUDENT MANAGEMENT SYSTEM ⬀

Student Management System – A simple web project built using **Java**, **Spring Boot**, and **Oracle Database**.
It can **add, view, update, and delete** student details like name, course, and age.
Used **Spring Data JPA** to connect and work with the database.
Tested using **Postman**; shows backend development skills with real-time database use.
